DECLARATION OF COMPLIANCE

For Food Contact Articles

We, Orego Arnbalaj San. Tie. A.'\$, hereby declare that paper cups from pe coated board are suitable to come in contact with foodstuffs, in conformity with the requirements of the following regulations and directives under the filling /treatment and storage conditions:

Regulation (EC) No 1935 / 2004 of the European Parliament and of the Council of 27 October 2004 on materials and articles intended to come into contact with food and repealing Directives 80 /590 / EEC and 89/109/EEC.

Comission Regulation (EU) No 10/2011 of 14 January 2011 on plastic materials and articles intended to come into contact with food Text with EEA relevance and its successive amendments up to and including 2020/1245

Commission Regulation (EU) 2022/1616 of 15 September 2022 on recycled plastic materials and articles intended to come into contact with foods, and repealing Regulation (EC) No 282/2008 (Text with EEA relevance)

Commission Regulation (EC) No 2023/2006 of 22 December 2006 on good manufacturing practice for materials and articles intended to come into contact with food (Text with EEA relevance)

European Parliament and Council Directive 94/62/EC of 20 December 1994 on packaging and packaging waste

Requirements for packaging recoverable by material recycling BS EN 13430:2004

Council Directive 82/711/EEC of 18 October 1982 laying down the basic rules necessary for testing migration of the constituents of plastic materials and articles intended to come into contact with foodstuffs

Regulation (EU) 2019/1021 of the European Parliament and of the Council of 20 June 2019 on persistent organic pollutants (Text with EEA relevance.)

FDA, CFR, Title 21 Part 177.1520 (a)(l), (b) and (c).1Olefin polymers

FDA, CFR, Title 21 Part 176.170 (Aqeous and Fatty Food Contact), 176.180 (Dry Food Contact) -Indirect Food Additives: Paper And Paperboard Components

The BfR recommendations XXXVI on paper and board for food contact in Gernnan

Product Description

That PE coated cups produced by PMC process from the pe coated board. When the first step produced pe coated board process is the printing process that is print by offset. And then second step is the PMC.

Printing Process

We do our printing process with ink and lacque. Ink series has a special special low migration formulation. We take the food contact declaration from our ink and lacque suppliers.

Due to the low migration formulation it is reasonable to assume that with these products migration limit of the European Union should be well achievable {Regulation (EU) 10/2011 and Regulation {EU} 1183/2012). Therefore it should be possible with these products to fulfil the legal requirements of EC regulation 1935/2004.

Article 3 of the Regulation 1935/2004 (impact on food) demands, that materials and articles do not transfer their constituents to food in quantities which could endanger human health or bring about an unacceptable change in the composition of the food or bring about a deterioration in the organoleptic characteristics thereof.

A possible impact on the quality of food does not solely depend on the printing ink/lacquer itself but is depending on the complete production chain (ink laydown, UV-power, substrate, etc.). For this reason we can generally not confirm a compliance to Regulation 1935/2004 only based on the composition of the ink/lacquer.

The EuPIA defined the requirements on printing ink manufacturers in the EuPIA-GMP. Printing inks applied to the non-food contact side of materials are regulated in the Annex of GMP regulation, EU2023/2006. Substances from the printed surface may not transfer to the food contact side through the substrate or by "set-off" in the stack or the reel.

Regulation EU 10/2011 and 1282/2011 establishes the specific rules for plastic materials and articles to be applied for their safe use and repeals Commission Directive 2002/72/EC of 6 August 2002 on plastic materials and articles intended to come into contact with foodstuffs.

In this regulation, the so called PIM {Plastic Implementation Measure} limits are set for substances, which are allowed to be indirect contact with food and are allowed to migrate into the food up to the level listed in Annex 1.

Substances used in printing inks must not (with few exemptions) get in direct contact with food and are therefore not listed in Annex 1.

The Swiss Ordinance (SR 817.023.21) which is only mandatory in Switzerland, is generally accepted by many companies as this regulation clearly establishes requirements for the use of printing inks on food contact materials. The Swiss ordinance is accompanied by lists of permitted substances, including evaluated substances subject to the requirements set out therein, and substances which are not

evaluated yet but are permitted if demonstrated that no transfer (below 10 ppb) of these substances to food or food simulants can be detected.

Spesification of the Intended Use or Restrictions

-Type or types of food or processes for which the material is suitable:

- queous foods, Acidic foods, Low Alcoholic foods, Fatty foods and Dry foods
- Suitable for hot filling. Any longterm storage at room temperature or below. Including up to 70 °C for up to 2 hours or up to 100 °C for max.1 hour.
- The products are suitable to use directly without requiring any preparation and handling instructions.
- They can be used at refrigerator, freezer/fridge (-20°C to 5 °C more than 24 hrs)
- They can be used at room temperatures (up to 40 °C for more than 24 hrs)
- It is not suitable for using conventional ovens and infrared heaters.
- This polymer coated board is not suitable for de-freezing and/or re-heating of food (e.g. ready meals) in microwave oven.

Storage Conditions and Shelf Life:

-Said products have to be kept in their original packaging in a cool temperature and dry place The recommended storage conditions are at 50-55% relative humidity and 20-23 °C.

-Avoid direct exposure to sunlight and UV light. If the products are stored under the described conditions shelf life is three years.

- In order to secure/ensure product safety the product must be well wrapped and stored indoor, sheltered from rain and snow. We recommend converting of the paperboard within 12 months from manufacturing date and after this time rights of claims normally disappear.

Overall Migration Limit

The overall migration limit was determined according to EU regulation 10/2011 and is below the threshold limit value of 10 mg/dm² at 40 °C 10 days or 100 °C 1 day for food simulants A, B, C, D1, D2 and E.

The measurements have been performed every year at 40 °C 10 days or 100 °C 1 day according to test code TS EN 1186 and EN 14338 by an independent test institute.

Specific Migration Limit

Plastic materials and articles shall not release the following substances in quantities exceeding the specific migration limits below (EU) 10/2011- Annex 11) :

Simulant	SML (mg/kg food or food simulant)
Aluminium	1
Ammonium	-
Antimony	0,04
Arsenic	ND
Barium	1
Cadmium	ND (LOAD 0,002)

Osmangazi Mah. 2647 Sok. No:5-134522 Kira , Esenyurt / iSTANBUL-TURKIYE

Phone: +90 212 8581333 **Fax:** +90 212 8581110 **www.orego.com.tr**

Calcium	-
Chromium	ND
Cobalt	0,05
Copper	5
Europium	0,05
Gadolinium	0,05
Iron	48
Lanthanum	0,05
Lead	ND
Lithium	0,6
Magnesium	-
Manganese	0,6
Mercury	ND
Nickel	0,02
Potassium	-
Sodium	-
Terbium	0,05
Zinc	5

The specific migration values shall be expressed in mg/kg applying the real surface to volume ratio in actual or foreseen use. According to EU 10/2011 the value of migration shall be expressed in mg/kg applying a surface to volume ratio of 6 dm² per kg of food.

SML's - plastic layer

Substances used in the board extrusion coating do not contain any monomers or additives with specific migration limit (SML) according to Commission Regulation (EU) 10/2011.

Bisphenol A:

The raw materials used in the production of paper cups and lids do not contain Bisphenol A.

Phthalates:

No phthalates are intentionally added in the production of paperboard.

Titanium Dioxide:

Paperboard producer hereby confirm that no Titanium dioxide is intentionally added in the production of paperboard.

Dual Use Additives:

Dual use additives subject to restrictions in food as defined in Regulation 10/2011/EC intentionally are not used in the manufacture or formulation of this product. This product does not contain monomers or additives which have SMLs, or QMAs as specified by Regulation 10/2011/EC.

Allergen Statements

Our paper cups products contains no identified allergenic materials and we hereby confirm that our products comply with the Food Allergen Labeling and Consumer Protection Act of 2004 (FALCPA) and the Regulation (EU) No 1169/2011, Annex 11 . However this product has not been tested for these substances.

Osmangazi Mah. 2647 Sok. No:5-134522 Kirac,;, Esenyurt / iSTANBUL-TURKIYE

Phone: +90 212 8581333 **Fax:** +90 212 8581110 **www.orego.com.tr**

No identified allergenic materials are present in the manufacturing facility and the product is manufactured in dedicated equipment.

Functionol Barrier

Our products haven't got functional barrier or the conformation that the material or article complies within the requirements.

Proposition 65

The paperboard does not require a warning under the Safe Drinking Water and Toxic Enforcement Act of 1986.

NIAS

NIAS subject to restrictions in food as defined in Regulation 10/2011/EC intentionally are not used in the manufacture or formulation of this product. This product does not contain monomers or additives which have SMLs as specified by Regulation 10/2011/EC. Our suppliers are expected to comply with NIAS. NIAS have been assessed following a risk assessment in accordance with internationally accepted scientific principles and comply with the requirements of Article 3 of Regulation (EC) No 1935/2004.

Recycled Raw Material Usage:

Orego PE coated cups are produced only from virgin coated board and do not contain post-consumer recycled components, and no obligation exists under the EU 2022/1616.

We do not use recycled coated board material in the manufacture of these products as described in the supporting document of the declaration of compliance by our suppliers.

Recycling

The our supplier product **Pe Coated** are paperboard with PE coating extrusion lamination, and this product is industrially **recyclable** according to **EN 13430**.

PFASs / PFCs / PFOA

According to third-party accredited laboratory testing, fluorine has not been detected in a water extract prepared from the product according to EN 645 (detection limit 0.05 µg/dm²).

By standing on the declarations of our raw material(paper, paperboard) suppliers, we commit that PFASs {Substances Perfluoroalkyle / Polyfluoroalkyle), PFCs {Perfluorocarbon) or PFOA (perfluorooctanoic acid) is not used during their production.. Based on declaration of conformity from raw material suppliers.

Bleached

When we use Bleached Cup Board that is "Ali used pulps are elemental chlorine free (ECF-pulps)" as described in the supporting document of the declaration of compliance by our suppliers.

Approved on Thursday, June 22, 2023. Valid for 1 year.
